

QUALITY, ENVIRONMENT AND SAFETY POLICY

Motor Power Company, which has had ISO 9001 certification since 1997, believes and has always believed that a concern for people's safety and respect for the environment are strategic corporate values. Therefore, the company's senior management decided that it was right to adopt an Environment and Safety Policy in addition to its existing Quality Policy, to produce an integrated Corporate Management System.

This document sets out the main aims of these policies:

QUALITY

- Provide customers with improved products and better technical support so that they are used and managed correctly
- Adopt appropriate methods for checking corporate processes, both internal (production, sales, etc.) and external (suppliers, customers)
- Continue to build the loyalty of the most strategic suppliers in order to develop specialised skills
- Implement risk management, as required under ISO 9001:2015

ENVIRONMENT

- Create a corporate culture aimed at protecting the environment, involving all internal and external staff (customers, suppliers, contract staff) and giving them appropriate resources and knowledge
- Comply with all relevant laws and regulations on the environment applicable to our activities, not as a duty but rather as a continuous and lasting commitment to spreading a culture of respect for the environment
- Reduce pollution by reducing waste and encouraging recovery and recycling
- Prevent and avoid accidents and incidents that could harm the environment
- Adopt the ISO 14001:2015 Environmental Management system

SAFETY

- Create a corporate culture aimed at ensuring the wellbeing and safety of its employees and visitors, by involving all internal and external personnel (customers, suppliers, contract staff) and giving them appropriate resources and knowledge
- Comply with all relevant laws and regulations on safety at work applicable to our activities, not as a duty but rather as a continuous and lasting commitment to spreading a culture of safety in the workplace
- Select suppliers and contractors that will work with us to create a safer company environment, working safely and seeking improvements together
- Prevent and avoid accidents and incidents that could be dangerous
- Adopt a Safety Management System

Motor Power Company undertakes to make its QUALITY, ENVIRONMENT AND SAFETY POLICY known to all its employees and to disseminate it outside the company through the usual means of communication such as bulletin boards, website and intranet.

To make sure that the aforementioned management systems are complied with, monitored and updated, Gianni Furlani has been appointed Motor Power Company's Head of Quality, Environment and Safety, reporting directly to senior management.

Motor Power Company is aware of the need to continually improve its environmental and safety performance, while ensuring that all interested parties are satisfied.
